6. Registered food products (July 2003 – June 2019)

Year	Applications received	Applications evaluated	Food registered	Applications rejected	Remarks
2003/04	162	2	0	0	Some of the evaluated food products were neither registered nor rejected because applicants could not respond to queries raised by evaluators. Food products which were not evaluated within the financial year were carried forward to next year. For the year 2003/2004 a small number of products were evaluated because of shortage of food evaluators.

2009/10	1,446	1,869	1,054	0	
2010/11	2,585	2,321	746	597	Also within the year no food product were registered because all evaluated applications had queries. Realizing that applications were not responding to queries in a timely manner leaving accumulation of unattended applications from the year 2010/2011, TFDA reduced grace period for responding to queries from six to four months coupled with improving system for keeping records. This resulted in expediting decisions on rejecting products that applicants could not respond to queries with the specified time
